Formerly Utilized Sites Remedial Action Program

No funds are included in the Army Corps' Budget for FUSRAP. The Budget proposes to return responsibility for management of the Formerly Utilized Sites Remedial Action Program (FUSRAP) back to the Department of Energy (DOE). The Army Corps would continue to perform cleanup of FUSRAP sites on a reimbursable basis with DOE. This proposal would enable DOE to consider a broader range of federal cleanup efforts in prioritizing work each year, thereby increasing the effectiveness and efficiency of Federal cleanup efforts.
